

CLOUD HOSTING

VIRTUAL SERVER

Designed from the ground up with business-critical applications in mind, ManagedWay's Virtual Servers enable your business to quickly and easily utilize compute, storage, and network resources on-demand.

VIRTUAL DATA CENTER

Virtual Data Centers offer automated provisioning, Disaster Recovery as a Service (DRaaS) to multiple geographic regions, fully managed support, scalability with just a click of a mouse, integrated daily, weekly, and monthly disk snapshots, custom templates, and so much more.

BARE METAL HARDWARE

Utilizing enterprise hardware, our powerful single tenant servers are available to you at an affordable price. Bare Metal Hardware allows you to utilize industry-leading hardware without the significant upfront expense.

GEOGRAPHIC DIVERSITY - Cloud Zones in Detroit, Los Angeles, Nashville, and Amsterdam.

SCALABILITY - Instantly add servers or increase server resources with the click of a mouse.

HIGH SECURITY - Our data centers are staffed on-site, around the clock and secured by a two-factor authentication process and CCTV.

DRaaS - Asynchronous replication at the block level between zones (in real time).
