

COLOCATION FACILITIES

SINGLE SERVER

Single server plans allow access to our advanced network and security offerings at an affordable price. 1RU and 2RU rack-mount servers are a good entry point for growing startups or small businesses.

SERVER CABINET

Offering Quarter, Half, and Full locking (42U) colocation cabinet packages. All of our colocation cabinets feature locking doors for added security. Full colocation cabinets offer 42U of continuous secure space, giving your business room to flourish and grow.

PRIVATE CAGE

Private Cage Colocation packages are built to suit your individual space, data, security policy, and power needs. Private cages are the preferred colocation method for customers with a large amount of equipment, or extra security and compliance requirements.

PRIVATE SUITE

Private Suites offer our highest level of security with a fully enclosed and locked private colocation room. Customize your floor plan, hardware, security policy, power, and cooling to fit your needs. Private Suites are the preferred colocation method for enterprise customers with high security and compliance requirements.

ON-SITE SUPPORT - Our Support team will handle everything from installations, delivery coordination, troubleshooting, and maintenance with a 1 Hour SLA and average 1-5 minute response time at no charge to the client.

CARRIER HOTEL - Our data centers are carrier neutral with access to 30+ carriers just a cross-connect away.

DIVERSE POWER - Our dual substation fed Tier III+ data centers guarantee 100% power uptime with N+1 generator and UPS redundancy.

HIGH SECURITY - We are SOC 2 Type 2, HIPAA, and PCI Compliant. Our data centers are staffed on-site, around the clock, and secured by a two-factor authentication process and CCTV.

NETWORK CONNECTIVITY - Premium backbone with Tier 1 peering provides our customers with a high level of redundancy and low latency.

CLIMATE CONTROL - Our state-of-the-art chilled water climate control systems ensure the most reliable and consistent environment for our data centers with N+1 redundancy.
