COMPLETE DDoS MITIGATION

Reduces business risk, mitigates network attacks, and provides you with peace of mind.

WHAT IS A DDoS ATTACK?

DDoS (Distributed Denial-of-Service) is a malicious network attack with the purpose to disrupt the flow of normal data or Internet traffic to a targeted IP address, network, or server by overwhelming the target with a flood of illegitimate data. These traffic jams impede legitimate data from arriving at its desired location, causing Internet service to degrade or stop entirely. Each year DDoS attacks are responsible for hundreds of thousands of lost work hours and billions of dollars in lost profits. The risk and severity of DDoS attacks are increasing year over year. In the last quarter of 2020 alone, DDoS attacks increased by over 639%

HOW managedDefender™ MITIGATES DDoS ATTACKS

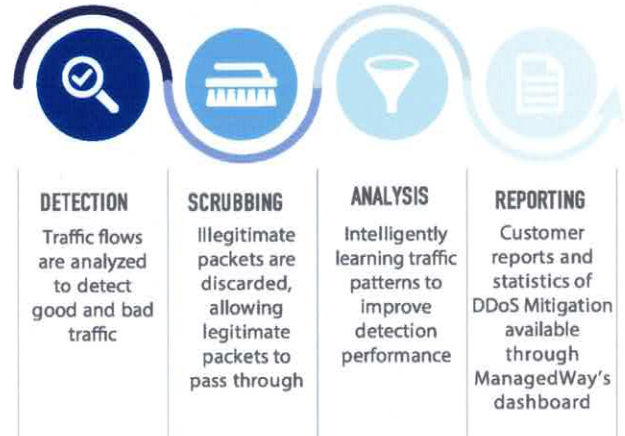

managedDefender™ is a complete, real-time DDoS Mitigation service. ManagedDefender is a device-based network scrubbing platform, which provides 100Gbps of automated traffic scrubbing. Our proprietary equipment used for ManagedDefender is monitored and controlled by ManagedWay's 24/7/365 Network Operations Center ensuring reliability and 24/7 support.

ManagedDefender analyzes Internet traffic and identifies each packet of data as a "good" or "bad" packet. By allowing good packets to reach their destination while automatically discarding bad packets, ManagedDefender DDoS attacks without the need for human intervention.

ManagedWay's network is engineered to be robust and capable of handling large amounts of data and malicious network attacks. ManagedWay successfully deploys DDoS Mitigation services across multiple industries such as governments, schools, service providers, financial institutions, enterprise businesses, publicly traded companies, and tech startups throughout the world.

**At least one ManagedWay network connection is required.*

DDoS MITIGATION STAGES

managedDefender™ FEATURES/BENEFITS

- ✓ Real-Time Traffic Analysis
- ✓ Automatic Traffic Scrubbing
- ✓ Automated Failover
- ✓ Premium Best-In-Class Equipment
- ✓ 24/7/365 Traffic Monitoring
- ✓ 100% Uptime SLA Guarantee

COLOCATION FACILITIES :: DEDICATED INTERNET :: CLOUD HOSTING
